

## Novel Coronavirus (COVID-19)—Fighting Products<sup>i</sup>

UPDATED 8/17/2020

The American Chemistry Council's (ACC) Center for Biocide Chemistries (CBC) has compiled a list of products that have been approved by the U.S. Environmental Protection Agency (EPA) for use against emerging enveloped viral pathogens and can be used during the current novel coronavirus (COVID-19) outbreak. **This product list is not exhaustive but can be used by business owners, health professionals, and the public to identify products suitable for use during the COVID-19 situation.**

The information in this document is being provided as a public service. All efforts have been made to ensure the information is accurate, but ACC and CBC make no representations or warranties as to the completeness or accuracy of the information. ACC, CBC, and the product manufacturers listed in this document reserve the right to change, delete, or otherwise modify the information without any prior notice. Persons receiving this information must make their own determination as to a product's suitability prior to use based on the product labeling. ACC and CBC do not guarantee or warrant the standard of any product referenced or imply approval of the product to the exclusion of others that may be available. All products listed are registered for labeled uses in accordance with federal laws and regulations as of the date this document is being made available. State regulations may vary. In no event will ACC or CBC be responsible for damages of any nature whatsoever resulting from the use of or reliance upon products to which the information refers.

**For more information about the COVID-19 Product list, please check out the following [COVID-19 FAQ](#) and the [Center for Biocide Chemistries FAQ](#). Additional information about how good chemistry is helping in the fight against COVID-19 can also be found at [Good Chemistry Lives Here](#).**

**Note:** The CBC cannot make a determination of the effectiveness of a product in fighting pathogens like COVID-19. For questions related to the effectiveness of any product not listed below, please contact the manufacturer directly.

**For use of the product,** please contact the company/distributor to confirm use directions, or consult the EPA approved label at <https://www.epa.gov/pesticide-labels/pesticide-product-label-system-ppls-more-information>.

### Key (Formulation Type):

1. RTU (Ready-To-Use): Formulas/products with no additional steps because they require no further dilution before application.
2. Dilutable: Pesticide product's labeling allows or requires the pesticide product to be mixed with a liquid diluent prior to application or use.
3. Wipe: A "wipe" is defined as a woven or non-woven shop towel, rag, pad, or swab made of wood pulp, fabric, cotton, polyester blends, or other material.

### Tier I - Products that Disinfect Against SARS-CoV-2

Tier I of CBC's list are those products that have been tested directly against SARS-CoV-2 and have been approved by EPA based on laboratory testing data and a review of the associated label claims.

#### Tier I - Products that Disinfect Against SARS-CoV-2

Commercially Available Product Name	Company/Distributor	EPA REG No.	Formulation Type
LYSOL® DISINFECTANT MAX COVER MIST	RB	777-127	RTU
LYSOL® DISINFECTANT SPRAY	RB	777-99	RTU
PROFESSIONAL LYSOL® DISINFECTANT SPRAY			

**Tier II Products - Products that are in compliance with EPA's *Emerging Viral Pathogen Guidance for Antimicrobial Pesticides***

Tier II of CBC's list are those products that are in compliance with EPA's Emerging Viral Pathogen Guidance for Antimicrobial Pesticides. As stated by EPA under its Emerging Viral Pathogen Guidance for Antimicrobial Pesticides, the following criteria must be met to make a claim against COVID-19:

1. The product is an EPA-registered, hospital/healthcare or broad-spectrum disinfectant with directions for use on hard, porous or non-porous surfaces; and
2. The currently accepted product label (from an EPA registered product as described above) has a disinfectant efficacy claim against one large or one small non-enveloped virus.

Tier II - Products that Disinfect Against Human Coronavirus

### Tier III - Products that Disinfect Against Human Coronavirus, Ebola, Norovirus, & Tuberculosis

Tier III of CBC's list are those product that have demonstrated efficacy against another human coronavirus similar to SARS-CoV-2 and are included on EPA's List N. Additionally, CBC is accepting products that have demonstrated efficacy against Ebola (List L), Norovirus (List G), and Tuberculosis (List B).

Note that EPA recommends using a product that will disinfect against human coronavirus, Ebola, Norovirus, or Tuberculosis ONLY if products that have demonstrated efficacy against SARS-CoV-2 or have the emerging viral pathogen claim are not available

Tier III - Products that Disinfect Against Human Coronavirus, Ebola, Norovirus, & Tuberculosis
